

PaCT II

Towards Sustainable Textile

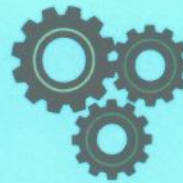

(2018-2021)

Global Apparel Brands

Factories

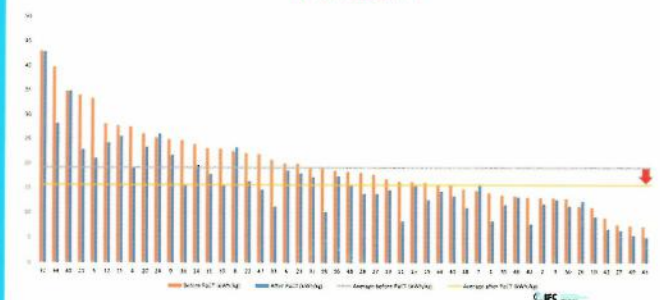

Technology Suppliers

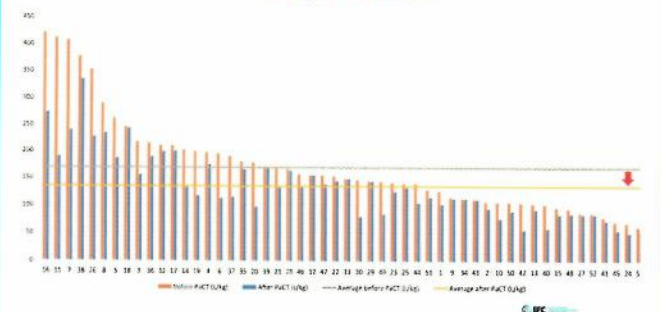

Financial Institutions

IFC led Advisory Partnership for Cleaner Textile is a joint initiative for International Brands and Apparel Trade Association (BGMEA). PaCT is working towards the implementation of best practices in the textile sector, with a focus on reducing resource consumption (energy, water, chemicals) and wastewater pollution.

On average, 50 factories undergoing In-depth CP reduced their energy consumption from 19.1 kWh/kg to 15.6 kWh/kg, a 19% reduction

On average, 53 factories undergoing in-depth CP reduced from 169 L/kg to 133 L/kg, a 21% reduction

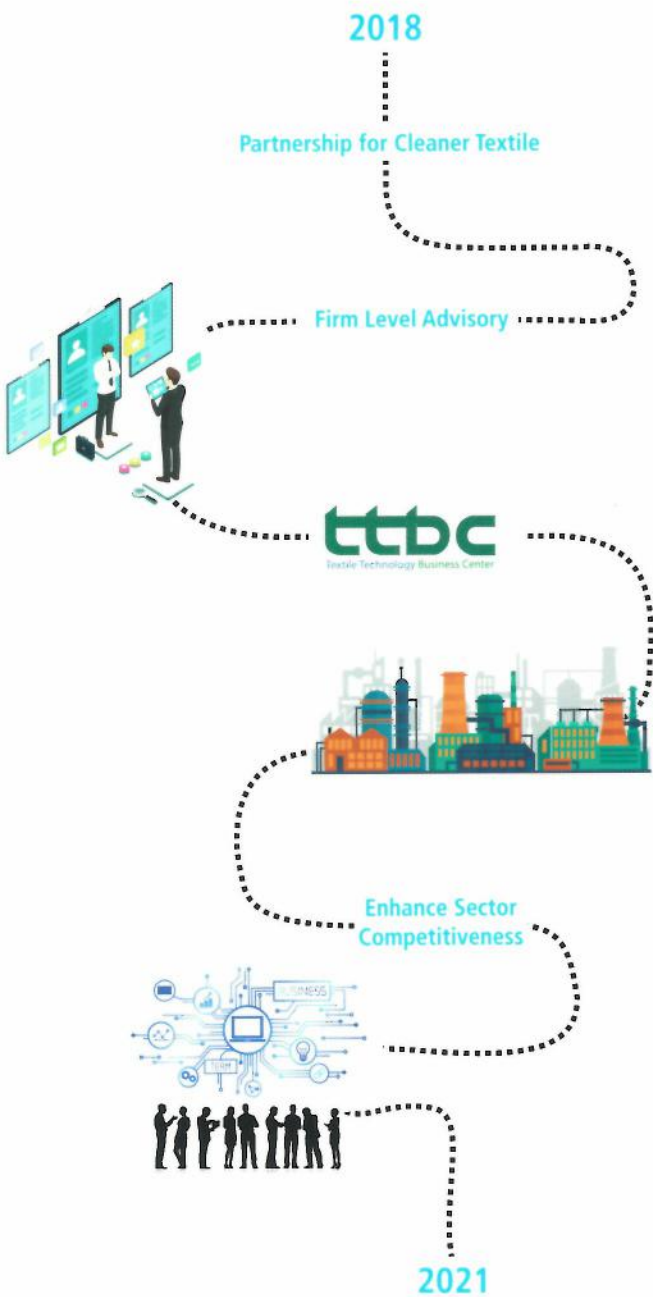

The Business Case for Resource Efficiency

for every US \$1 invested....

Program Approach

Firm Level Advisory

The program will include a broad spectrum of technical assistance to factories and global apparel brands:

- Cleaner Production Assessments
- Energy Efficiency Audits
- Solar Rooftop PV Feasibility Studies
- Chemical Management Assessment
- Customized Brand Level Support (ZDHC Initiative, support Brand level strategy for renewable energy/water use etc.)
- Pipeline development for Resource Efficiency Financing
- Online Resource Monitoring

Textile Technology Business Center (TTBC)

- Nurture B2B linkages between factories and technology suppliers
- Develop knowledge products
- Conduct learning workshops on textile technology processes
- Capacity building of factory mid level managers and workers
- Create a global knowledge base and support knowledge transfer

Enhance Sector Competitiveness

The program will strive to build an enabling environment that will catalyze better uptake of resource efficient technologies across the sector through public private dialogue and advocacy.

It's time to act, join PaCT!
